DEVEL 16 - The new Moritz Grossmann timepiece for the 5000 HP hypercar

Grossmann Uhren unveils new DEVEL 16 timepiece after the successful presentation of the GMT and the TEFNUT 1001 Nights with golden Milanaisé bracelet in Dubai

What do lovers of hypercars and handcrafted fine mechanical watches have in common? Both are united by a sense of perfect beauty combined with uncompromising functionality and precision. With its 5000 horsepower, the 16-cylinder record-breaking Devel Sixteen is currently the most powerful hypercar in the world. The independent Glashütte watch manufactory Moritz Grossmann and the company - Defining Extreme Vehicles Car Industry - from Dubai present the new DEVEL 16 watch.

The founder and CEO of Grossmann Uhren GmbH, Christine Hutter, together with Devel Motors CEO Majid Al Attar, exclusively announces a cooperation between the two brands as of 14 February 2019, prior to the official opening of the new Devel Motors showroom in Dubai. A DEVEL 16 model will be presented together with the Devel Sixteen sports car in the new Devel Motors showroom in Dubai. The DEVEL 16 watch will soon be available exclusively from Devel Motors. <http://develmotors.com/>

The Moritz Grossmann DEVEL 16 boasts a blackened stainless steel case. Inspired by the number of cylinders in the Devel Sixteen sports car, there is to be a limited edition of 16 watches. The DEVEL 16 dial is designed in polished stainless steel to match the rim of the Devel Sixteen sports car. The openings between the rim spokes allow a view of the calibre 100.1 in the High Artistic Finish. The surface of the spokes and the rim edge appears immaculate due to the mirror polishing. Depending on the viewing angle, it either shines black or reflects the light like as a mirror would. A yellow Devel Motors logo graces the subsidiary seconds on a

black background with a fine yellow border. The yellow stitching of the black leather wristband matches the colour in perfect harmony.

The striking indices on the blackened stainless steel outer dial ring are filled with grey Hy-Ceram, accentuating the sporty elegance of the timepiece. The lance-shaped hands, filled with black Hy-Ceram, further enhance the watch's refined appearance.

The Moritz Grossmann brand manufactures mechanical timepieces to the highest standard of craftsmanship. The independent manufactory has once again demonstrated its openness to new creative designs and a sporty, elegant touch with the new DEVEL 16 watch.

Technical data:

Movement positions	Manufactory calibre 100.1, manual winding, regulated in five positions
No. of parts	198
Jewels	20 jewels, of which 3 in screwed gold chatons
Escapement	Lever escapement
Oscillator	Shock-resistant Grossmann balance with 4 inertia screws and 2 poising screws, Nivarox 1 balance spring with No. 80 Breguet terminal curve, Gustav Gerstenberger geometry
Balance	Diameter: 14.2 mm, frequency: 18,000 semi-oscillations/hour
Power reserve	42 hours when fully wound
Functions	Hours and minutes, subsidiary seconds with stop second, Grossmann manual winder with pusher
Operating elements	Crowns in stainless steel to wind the watch and set the time and the date, pusher to start the watch
Case dimensions	Diameter: 41.0 mm, height: 11.35 mm
Movement dimensions	Diameter: 36.4 mm, height: 5.0 mm
Case	Three-part, precious metal blackened
Dial	Blackened stainless steel
Hands	Handcrafted, steel, or stainless steel, indices filled with Hy-Ceram
Crystal/display back	Sapphire crystal, antireflective coating on one side
Strap	leather strap with prong buckle in precious metal blackend
Special features	Grossmann balance; hand setting override and start of movement with lateral pusher; space-saving modified Glashütte stopwork with backlash; adjustment with Grossmann micrometer screw on cantilevered balance cock; pillar movement with 2/3 plate and pillars made of untreated German silver; 2/3 plate, balance cock and escape-wheel cock hand-engraved; broad horizontal Glashütte ribbing; 3-band snailing on the ratchet wheel; raised gold chatons with pan-head screws; separately removable clutch winding mechanism; stop seconds for hand setting

Moritz Grossmann watches:

Moritz Grossmann, born in Dresden in 1826, was deemed a visionary among Germany's great horologists. In 1854, his friend Ferdinand Adolph Lange persuaded the young, highly talented watchmaker to establish his own mechanical workshop in Glashütte. In addition to establishing a prestigious watchmaking business, Grossmann became engaged both politically and socially, founding the German School of Watchmaking in 1878. Moritz Grossmann died unexpectedly in 1885 and his watch manufactory was closed.

In 2008, the spirit of Moritz Grossmann's traditional watchmaking was revived when trained watchmaker Christine Hutter discovered the old Glashütte watch brand 'Moritz Grossmann' and had it protected. She developed concepts and was inspired by the vision of reviving Grossmann's legacy more than 120 years later with a particularly exquisite wristwatch. And she convinced private watch enthusiasts to support her in making this dream come true. On 11 November 2008 she founded Grossmann Uhren GmbH in Glashütte.

Today, Grossmann's watchmakers preserve traditions but without copying historical pieces. With innovation, superb craftsmanship, a combination of traditional and contemporary manufacturing methods as well as precious materials, they celebrate 'Schönstes deutsches Handwerk' with their watches.
