LOT 108 _ OX Two

One-off piece made from stainless steel, hand-painted as a miniature drawing according to the artistic design of Tony Käseberg. Including original painting of the artist.

The side view of the ox shows off the animal in all its glory. With his sketch style, the artist breaks up the familiar grid of a detailed drawing and gives the motif a 'wild' touch. The increasingly intense colour gradient shows the tonicity of the ox, which increases from the legs to the horns.

In line with its second position in the Chinese zodiac, the ox's self-confident gaze is directed towards 2 o'clock.

The ox is very hard-working, reliable, ambitious and determined. Oxes are extremely honest and sincere. Oxes work tenaciously and with a lot of patience until they reach their goal. But first they have to draw up an exact plan.

The polished stainless steel hands, handcrafted in the manufactory, harmonise with the solid silver dial.

Calibre 100.1 in a High Artistic Finish combined with a case made from stainless steel. Engraving 1 / 1.

Grossmann manual winding with pusher for a perfected hand setting mechanism.

The model was manufactured in High Artistic Finish with the calibre 100.1. The movement is visible though the generous transparent back made of sapphire crystal with an anti-reflective coating on one side. The pillar movement with well-proportioned components made of untreated German silver with various finishes forms different levels. On the characteristic 2/3 plate with broad horizontal ribbing, the signet is engraved by hand. The Grossmann balance is visible in the curved plate cut-out and is borne by the stepped, hand-engraved balance cock with the typical fine micrometer screw.

Years of birth under the sign of the ox: 1937, 1949, 1961, 1973, 1985, 1997, 2009, 2021

Name of the artist: Tony Käseberg

Calibre 100.1

Original Painting from the artist Tony Käseberg

Moritz Grossmann watches:

Moritz Grossmann, born in Dresden in 1826, was deemed a visionary among Germany's great horologists. In 1854, his friend Ferdinand Adolph Lange persuaded the young, highly talented watchmaker to establish his own mechanical workshop in Glashütte. Apart from building a respected watchmaking business, Grossmann was committed to political and social causes. He established the German School of Watchmaking in 1878. Moritz Grossmann passed away unexpectedly in 1885, after which his manufacture was liquidated.

The spirit of Moritz Grossmann's horological traditions sprang back to life in 2008 when trained watchmaker Christine Hutter discovered the venerable Glashütte brand and had it re-registered. She developed concepts and was inspired by the vision of reviving Grossmann's legacy more than 120 years later with a particularly exquisite wristwatch. And she convinced private watch enthusiasts to support her in making this dream come true. On 11 November 2008 she founded Grossmann Uhren GmbH in Glashütte.

At Grossmann, gifted watchmakers are preserving traditions without copying historic timepieces. With innovation, superb craftsmanship, a combination of traditional and contemporary manufacturing methods as well as precious materials, they celebrate "Schönstes deutsches Handwerk" with their timepieces.
